

MONDAY 21/11	TUESDAY 22/11							
	9:30 <b>Lothar Schermelleh</b> : The power of SIM - structured illumination microscopy as a tool for biological discovery							
	10:15 COFFEE BREAK							
	10:30 <b>Peter Dedecker</b> : More informative imaging with 'smart' probes and PSF engineering							
	11:15 <b>Claire Deo</b> : Chemigenetic molecular tools for biological imaging							
13:00 WELCOME & LUNCH	12:00 LUNCH BREAK							
14:00 <b>Joerg Bewersdorf</b> : All-optical Super-resolution Imaging of Molecules in Their Nanoscale Cellular Context	<table border="1"> <tr> <td data-bbox="1025 667 1301 1447">14:00 - 17:30 <b>Practical 8 (ENS)</b>: Light sources for optogenetics (2x 3 people)</td> <td data-bbox="1301 667 1610 1447">14:00 - 17:30 <b>Practical 9 (ENS)</b>: Non-classical genetically modified fluorescent probes for biological imaging (3 people)</td> <td data-bbox="1610 667 1901 1447">14:00 - 17:30: <b>Practical 1 (Curie)</b>: Combining micro UV-irradiation and Single Particle Tracking in living cells (3 people)</td> <td data-bbox="1901 667 2168 1447">14:00-17:30: <b>Practical 3 (IJM)</b>: FRET-based molecular tension sensors and FLIM (3 people)</td> </tr> </table>				14:00 - 17:30 <b>Practical 8 (ENS)</b> : Light sources for optogenetics (2x 3 people)	14:00 - 17:30 <b>Practical 9 (ENS)</b> : Non-classical genetically modified fluorescent probes for biological imaging (3 people)	14:00 - 17:30: <b>Practical 1 (Curie)</b> : Combining micro UV-irradiation and Single Particle Tracking in living cells (3 people)	14:00-17:30: <b>Practical 3 (IJM)</b> : FRET-based molecular tension sensors and FLIM (3 people)
14:00 - 17:30 <b>Practical 8 (ENS)</b> : Light sources for optogenetics (2x 3 people)					14:00 - 17:30 <b>Practical 9 (ENS)</b> : Non-classical genetically modified fluorescent probes for biological imaging (3 people)	14:00 - 17:30: <b>Practical 1 (Curie)</b> : Combining micro UV-irradiation and Single Particle Tracking in living cells (3 people)	14:00-17:30: <b>Practical 3 (IJM)</b> : FRET-based molecular tension sensors and FLIM (3 people)	
14:45 <b>Judith Mine-Hattab</b> : Single Particle Tracking in the context of DNA repair								
15:00 <b>Ludovic Jullien</b> , PASTEUR, Département de chimie, École normale supérieure, PSL University, Sorbonne Université, CNRS: Non-standard genetically encoded fluorescent probes for biological imaging								
15:20 <b>Nicolas Borghi</b> , Institut Jacques Monod: Using biosensors, FRET and FLIM to study how cells perceive epithelial density								
15:40 COFFEE BREAK								
16:00 <b>Juliette Azimzadeh</b> , Institut Jacques Monod: Using expansion microscopy to study the architecture of centrioles								
16:20 <b>Mickael Lelek, Audrey Salles</b> : Nucleopore complexe imaging in 3D using double helix-STORM and 3D-SIM								
16:40 <b>Diana Passaro</b> , Institut Cochin: From deep imaging to vascular patterning: multiple applications of two photon microscopy in complex tissue manipulation								
17:00 <b>Lydia Danglot</b> : From molecules to thick tissue imaging : SIM, STED or STORM ?								

WEDNESDAY 23/11				THURSDAY 24/11	
9:30: <b>Sandrine Lévêque-Fort</b> : Modulated excitation for in depth single molecule localization microscopy				09:30: <b>Giulia Bertolin</b> : Exploring mitochondrial functions: from FRET biosensors to super-resolution microscopy	
10:15 COFFEE BREAK				10:15 COFFEE BREAK	
10:30 : <b>Jean-Baptiste Sibarita</b> : Quantitative multi-scale imaging using single-objective light-sheet microscopy				10:30 <b>Ricardo Henriques</b> : Open technology for Super-Resolution and Machine-Learning enabled Live-Cell Bioluminescence	
11:15 <b>Marie Erard</b> : Fluorescence Lifetime Imaging (FLIM) to monitor bio-chemical processes in living cells				11:15 <b>Christophe Leterrier</b> : The functional nano-architecture of axonal actin	
12:00 LUNCH BREAK				12:00-12:10 - <b>LEICA's presentation</b> 12:10 - LUNCH BREAK	
14:00- 17:00: <b>Practical 4 (IJM)</b> : Imaging of cellular ultrastructures with expansion microscopy (3 people)	14:00-17:30 <b>Practical 7 (Pasteur)</b> : Biological structures imaging in 3D using double helix-STORM and 3D-SIM (6 people)	14:00 - 17:30 <b>Practical 2* (Cochin)</b> : Spectral detection multiphoton microscopy, signal unmixing with FLIM contrast & SMLM multi-color: from sample preparation to quantification (6 people)	14:00-17:30: <b>Practical 5 bis (IPNP)</b> : SIM, STED or STORM : from sample prep to 3D imaging & <b>Practical 5' bis</b> : 3D STED : Comparing flat cells vs thick samples (6 people)	14:00-17:30: <b>Practical 5 (IPNP)</b> : SIM, STED or STORM : from sample prep to 3D imaging & <b>Practical 5'</b> 3D STED : Comparing flat cells vs thick samples (6 people)	14:00 - 17:30 <b>Practical 2 (Cochin)</b> : Spectral detection multiphoton microscopy, signal unmixing with FLIM contrast & <b>Practical 2'</b> SMLM multi-color: from sample preparation to quantification(6 people)

**FRIDAY  
25/11**

9:30 **Gaëlle Recher**: Using microfabrication and parallelised imaging to investigate morphodynamics of encapsulated spheroids

10:15 COFFEE BREAK

10:30 **Gustavo Quintas** : Multiscale light-sheet organoid imaging framework

11:15 **Emmanuel Beaurepaire**: Strategies for large-volume/fast multiphoton imaging of uncleared tissue

12:00 LUNCH BREAK

14:00 - 17:30: **Practical 1 (Curie)**: Combining micro UV-irradiation and Single Particle Tracking in living cells (3 people)

14:00-17:30 **Practical 7 (Pasteur)**: Biological structures imaging in 3D using double helix-STORM and 3D-SIM (6 people)

14:00 - 17:30: **Practical 6 (IPNP)**: Culturing and imaging multicolour 3D live brain organoids & **Practical 6'** Combining fast imaging on 3D live sample with Z resolution preservation (6 people)

**Organized by:**

**FRANCE-BIOIMAGING**

**Sponsors:**

**On-site booth:**

**and:**

**The Twinkle Factory**  
Stain different, tag FAST.
